

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

LISTING OF CLAIMS:

Claims 1-14 (Cancelled)

15. (New) A method for interfacing with a plurality of images comprising:
displaying said plurality of images aligned relative to one another in rows and columns;
moving a cursor over one of said plurality of images; and
enlarging said one of said plurality of images, wherein said one of said plurality of images overlaps at least one image.

16. (New) The method of claim 15, wherein when said cursor is not positioned over any one of said images, none of said plurality of images overlap any other of said plurality of images.

17. (New) The method of claim 15, wherein said one of said plurality of images, when enlarged, overlaps each image adjacent thereto.

18. (New) The method of claim 15, wherein said plurality of images are static.

19. (New) The method of claim 15, wherein said plurality of images are movie cover art.

20. (New) The method of claim 15, wherein said each of said plurality of

images represent a selectable media item.

21. (New) The method of claim 20, further comprising:
clicking on said one of said plurality of images; and
launching a media item represented by said one of said plurality of images.

22. (New) The method of claim 15, further comprising:
providing additional information associated with said one of said plurality of
images after enlarging said one of said plurality of images.

23. (New) The method of claim 15, wherein said enlarging of said one of said
plurality of images indicates that said one of said plurality of images currently has a
focus of an interface and that said a media item represented by said one of said plurality
of images can be selected.

24. (New) A user interface comprising:
means for displaying said plurality of images aligned relative to one another in
rows and columns;
means for moving a cursor over one of said plurality of images; and
means for enlarging said one of said plurality of images, wherein said one of said
plurality of images overlaps at least one image.

25. (New) The user interface of claim 24, wherein when said cursor is not
positioned over any one of said images, none of said plurality of images overlap any
other of said plurality of images.

26. (New) The user interface of claim 24, wherein said one of said plurality of
images, when enlarged, overlaps each image adjacent thereto.

27. (New) The user interface of claim 24, wherein said plurality of images are static.

28. (New) The user interface of claim 24, wherein said plurality of images are movie cover art.

29. (New) The user interface of claim 24, wherein said each of said plurality of images represent a selectable media item.

30. (New) The user interface of claim 29, further comprising:
means for clicking on said one of said plurality of images; and
means for launching a media item represented by said one of said plurality of images.

31. (New) The user interface of claim 24, further comprising:
means for providing additional information associated with said one of said plurality of images after enlarging said one of said plurality of images.

32. (New) The user interface of claim 24, wherein said means for enlarging of said one of said plurality of images indicates that said one of said plurality of images currently has a focus of an interface and that said a media item represented by said one of said plurality of images can be selected.

33. (New) A computer-readable medium containing instructions which, when executed on a computer, perform the steps of:
displaying a plurality of images aligned relative to one another in rows and columns;
enabling movement of a cursor over one of said plurality of images; and
enlarging said one of said plurality of images, wherein said one of said plurality of

images overlaps at least one image.

34. (New) The computer-readable medium of claim 33, wherein when said cursor is not positioned over any one of said images, none of said plurality of images overlap any other of said plurality of images.

35. (New) The computer-readable medium of claim 33, wherein said one of said plurality of images, when enlarged, overlaps each image adjacent thereto.

36. (New) The computer-readable medium of claim 33, wherein said plurality of images are static.

37. (New) The computer-readable medium of claim 33, wherein said plurality of images are movie cover art.

38. (New) The computer-readable medium of claim 33, wherein said each of said plurality of images represent a selectable media item.

39. (New) The computer-readable medium of claim 38, further containing instructions which, when executed on a computer, perform the steps of:
receiving a click input on said one of said plurality of images; and
launching a media item represented by said one of said plurality of images.

40. (New) The computer-readable medium of claim 33, further containing instructions which, when executed on a computer, perform the steps of:
providing additional information associated with said one of said plurality of images after enlarging said one of said plurality of images.

41. (New) The computer-readable medium of claim 33, wherein said

enlarging of said one of said plurality of images indicates that said one of said plurality of images currently has a focus of an interface and that said a media item represented by said one of said plurality of images can be selected.
